Systems

GM, Inspur

Inspur's OCP Timeline

Inspur's Current Direction

1

Enhance

our relationship with the OCP community to design products needed in the marketplace

2

Develop

new products and technologies specific to the OCP initiative

3

Contribute

our knowledge and designs to the OCP community

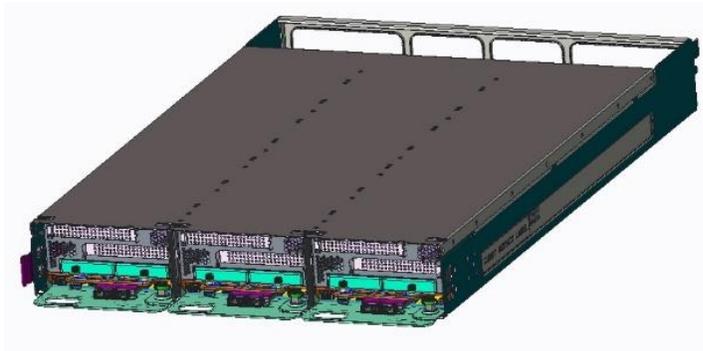

20U Xeon Scalable Compute Platform

OCP™
ACCEPTED

20U 3*Node

CPU: 2x Intel Xeon Scalable processor
DIMM slot: 16 DIMMs

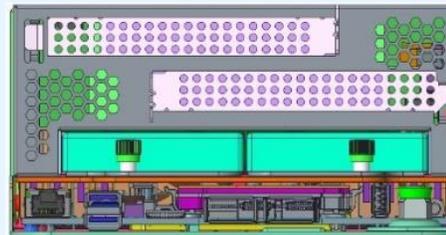

Expansion Slot:

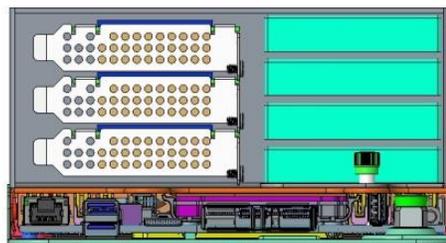

SKU1: ON5263M5

1. 1*3.5" SATA
2. 1*FHHL PCIE x16 Card(CPU0)
3. 1*FHHL PCIE x16 Card(CPU0)
4. 2*M.2

SKU2:

1. 2*2.5" HDD or NVME(x4)
2. 1*FHFL PCIE x16 Card(CPU0)
3. 1*FHHL PCIE x16 Card(CPU1)
4. 2*M.2

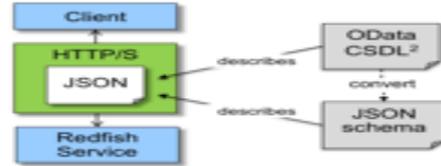

SKU3:

1. 4*NVMe (x4)
2. 3*HHHL PCIE x8 Card(CPU0)
3. 1*M.2

Remote Management Protocol

The Redfish Standard

- Redfish includes
 - An interface definition
 - Model schema
- Redfish interface (RESTful)
 - HTTP/HTTPS - protocol
 - JSON – format of content
- Redfish models schema
 - Schema format for JSON
 - DMTF develops the models for platforms and compute/servers
 - Other organization may create models for their management domain

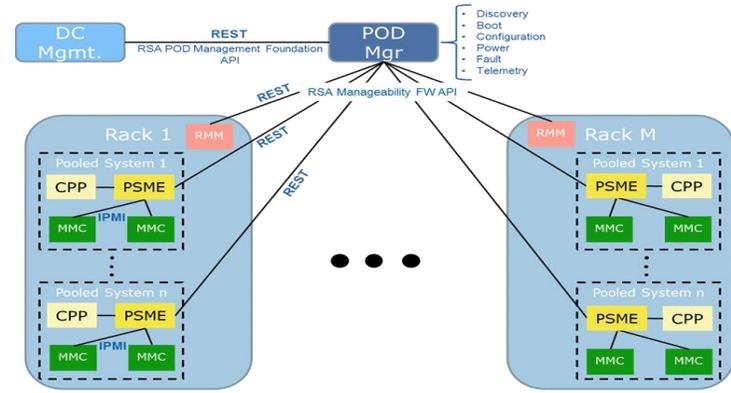

¹OData is an OASIS Standard
²CSDL = Common Schema Definition Language

www.dmtf.org

Redfish/Restful Function, implement and continually upgrade Redfish spec, Inspur defined functionality extension

1

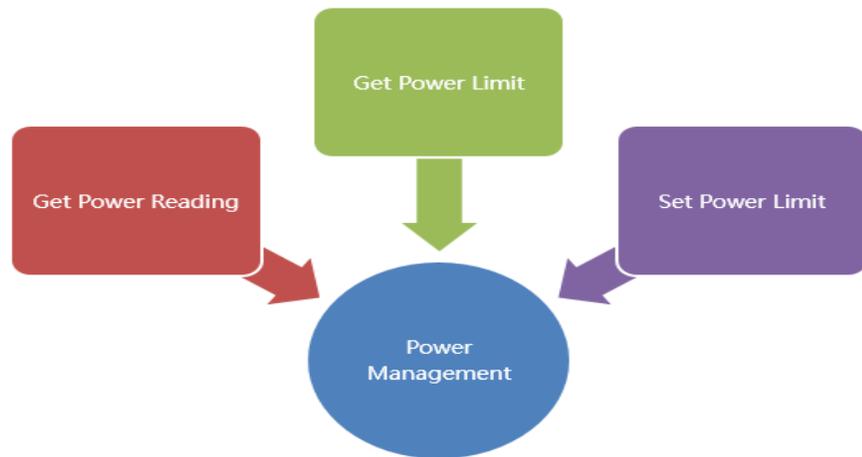

Develop PSME and RMM modules to achieve BMC / CMC compatibility support for Intel **RSD 2.2**

2

DCMI 1.5, implement power management, temperature monitor & chassis control

3

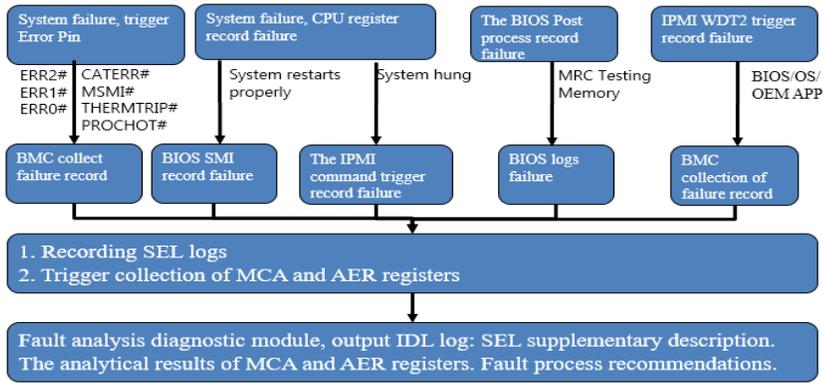

SNMP Function, support Get/Set/Trap & V1/ V2C / V3 protocol, implement Inspur defined security access control mechanism

4

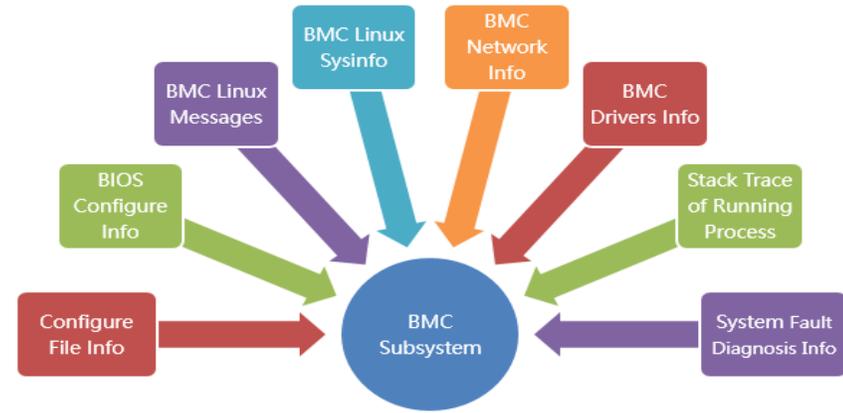

System & BMC Subsystem Features

System fault diagnosis function, realizes the system fault rapid diagnosis. output the detailed fault records and recommendations.

5

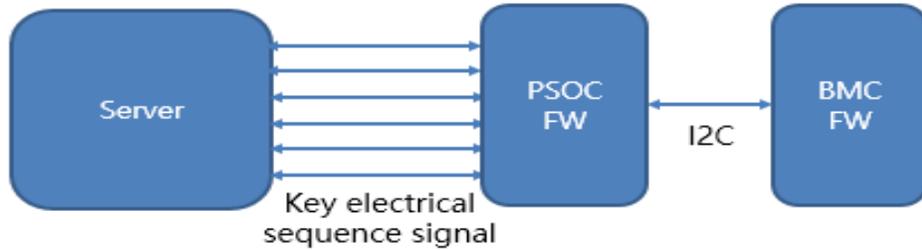

BMC subsystem fault diagnosis realize fast diagnosis of BMC subsystem

6

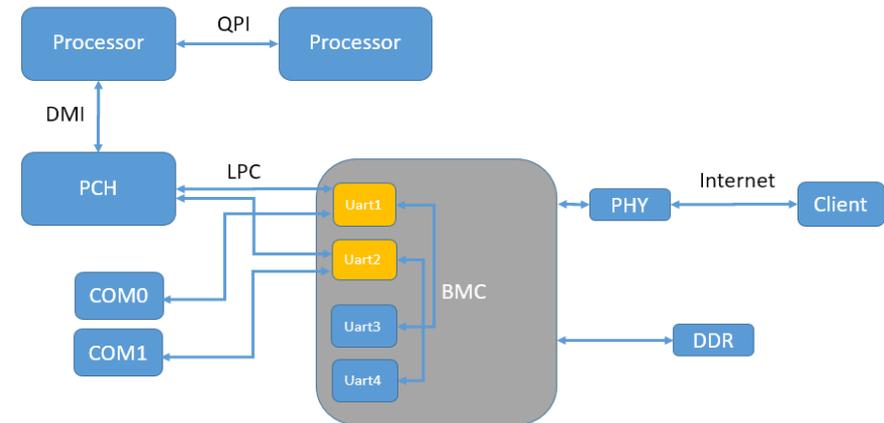

Key signal detection, realized the detection of the key power sequence signal

7

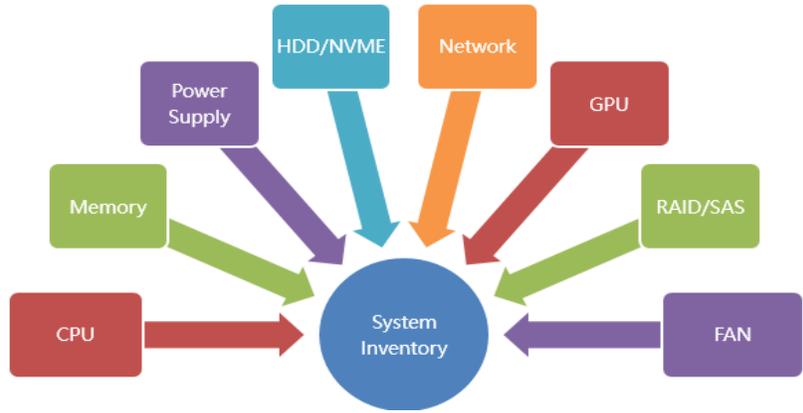

SOL logging function, rich system fault diagnosis functional logic

8

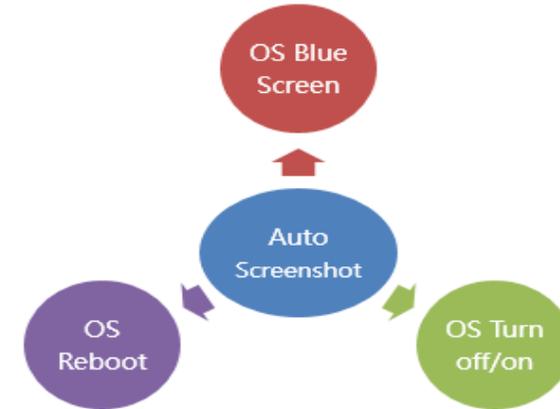

Key Management Functions

System inventory, implement inventory monitor(CPU, Memory, Power Supply, Fan, Hard Disk, NVME, Net Card, GPU, RAID, etc.)

9

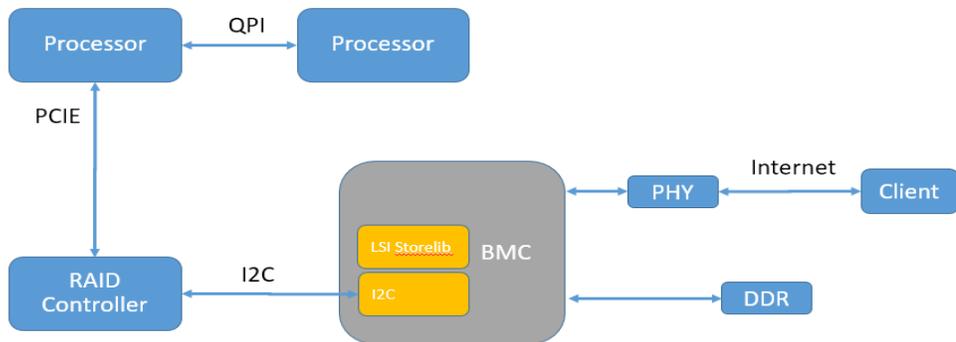

Auto & Manual Screenshot, support OS blue screen/power off/restart automatic screenshot & manual screen capture

10

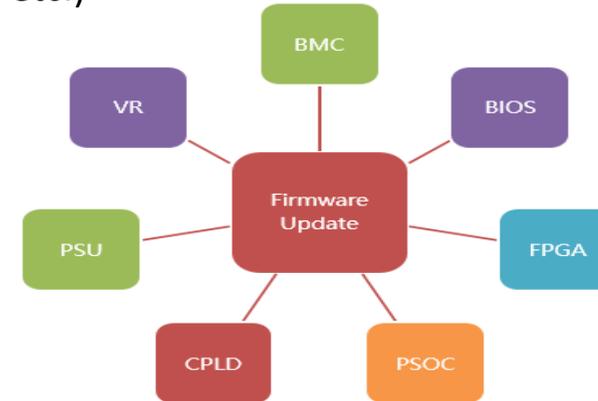

RAID/SAS Monitor/Configuration/Log function, implement inventory monitor, raid configuration & controller log record

11

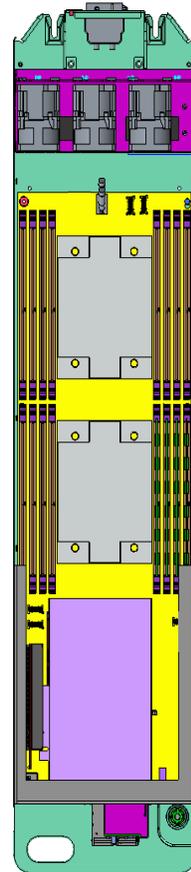

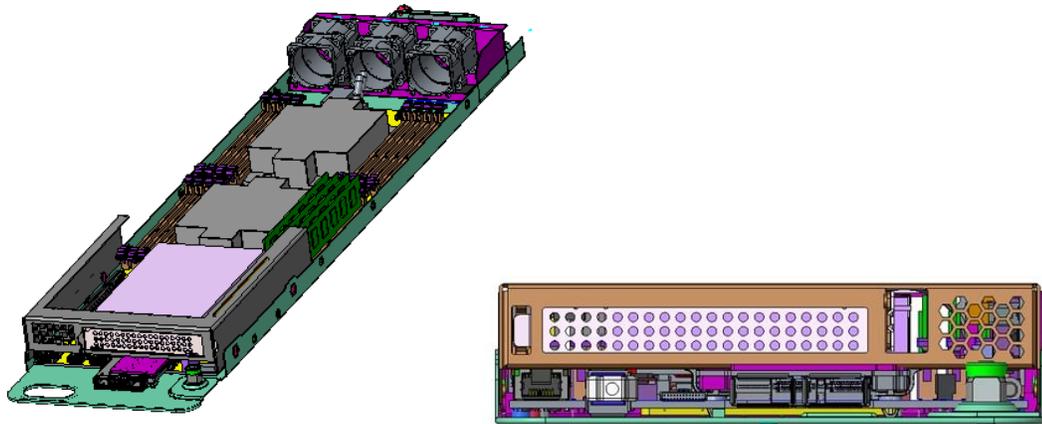

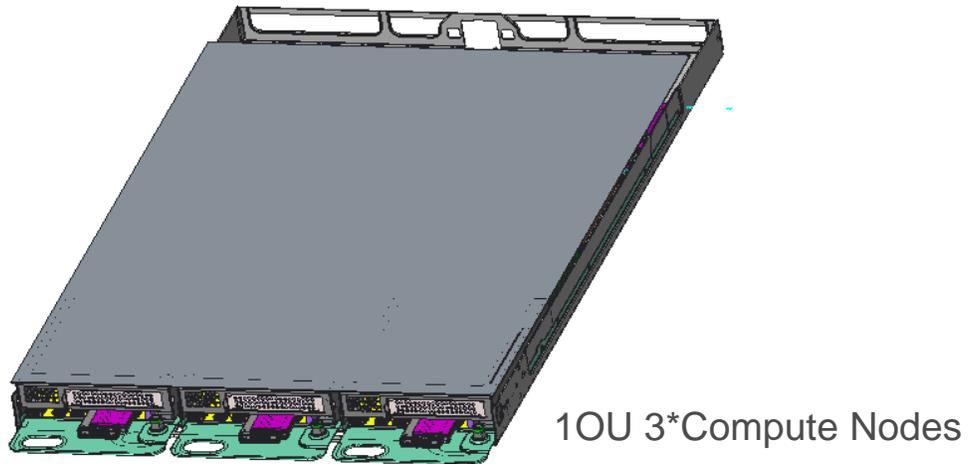

Component **Firmware update**, implement common component update function(BMC, BIOS, FPGA, PSOC, PSU, VR, etc.)

12

10U For Higher Compute Density

10U 3*Node

CPU:

2* Intel Xeon Scalable processor

DIMM slot: 16 DIMMs

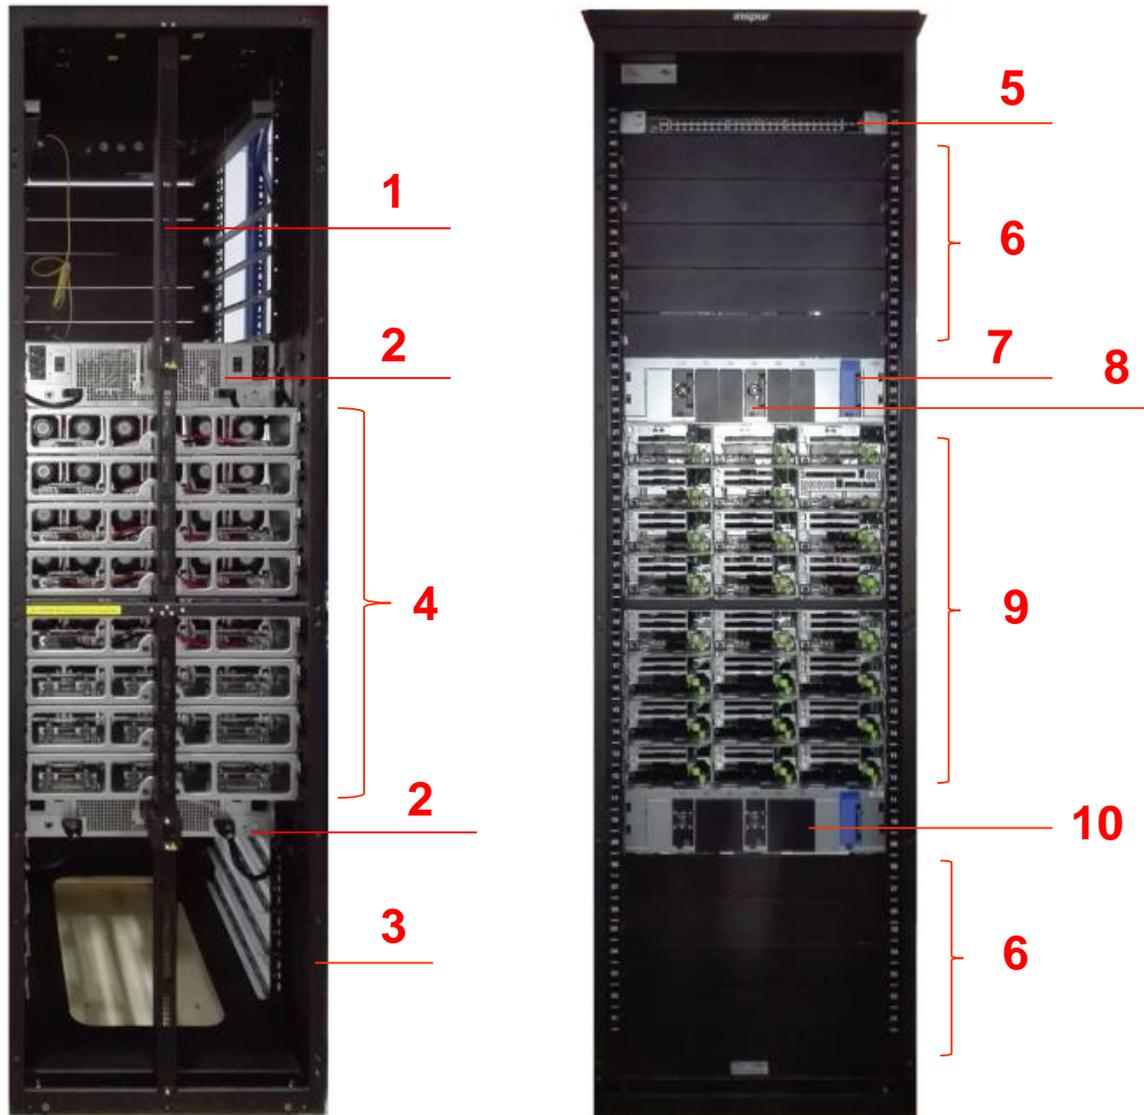

Expansion Slot:

- 1x FHHL (x16) : CPU0

Storage:

- 1 or 2*M.2

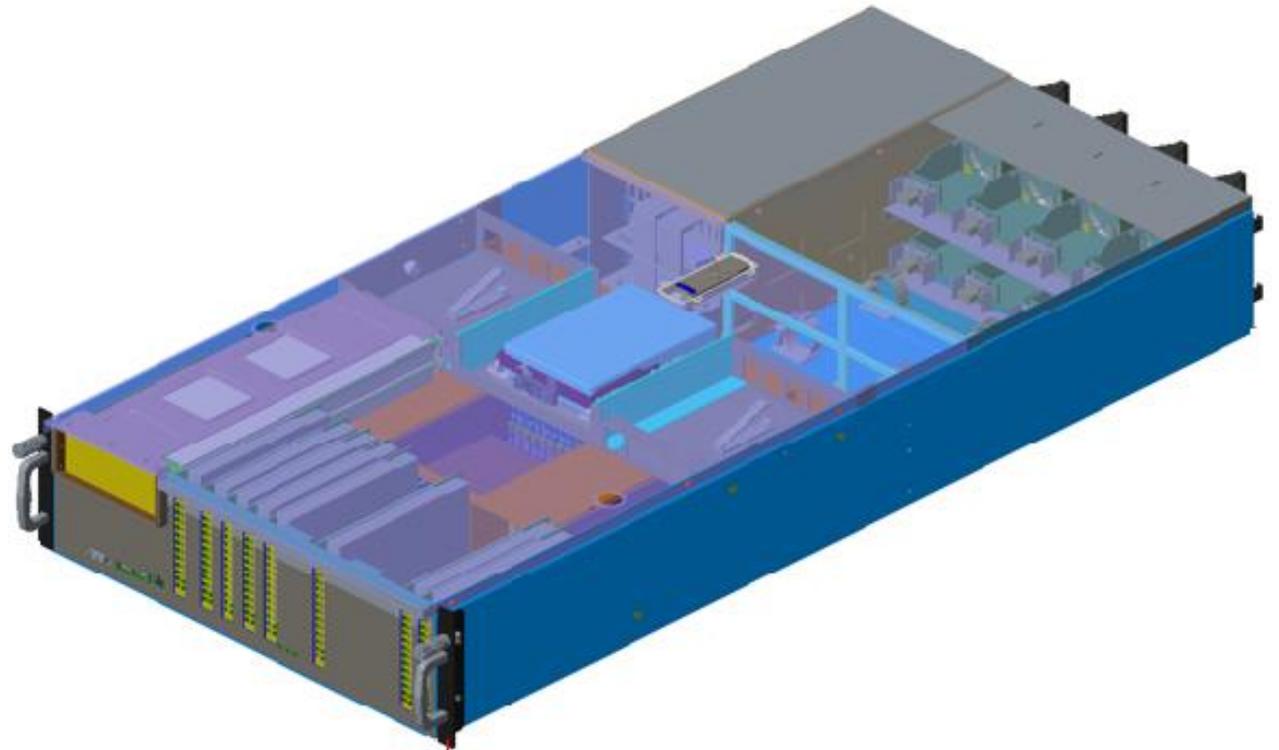

Open Rack Series

Item	Name
1	Copper bar
2	Power shelf
3	Rack
4	Rear of the server nodes
5	Switch
6	Blind plate
7	COMM module
8	PSU
9	Front of the server nodes
10	PSU blind plate

Project Olympus

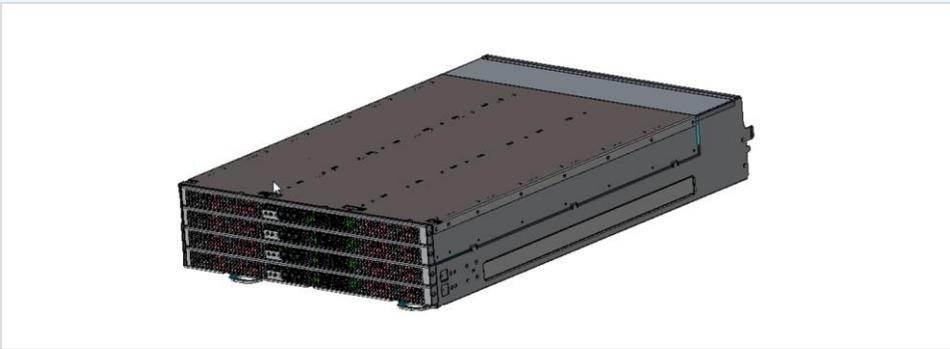

Inspur's venture with Project Olympus is a high performance 4-socket server based on the latest Intel® Xeon® Scalable processor platform that provides significant boosts and benefits over dual socket servers

Future Storage Designs

*Currently in the design phase

30U 64Bay JBOD

Specification

- 30U
- Support 1~64 drives
- Four-bay, each bay support 16 drives
- Drive support 2.5" or 3.5" HDD

40U 75Bay System

Specification

- 40U
- Support 1~75 drives
- Drive support 2.5" or 3.5" HDD

inspur

Thank You
